Subject: Proposal 22
Date: Thursday, December 2, 2021 1:18:22 PM

Madam Chair and members of the BOF

I would just like to clarify that Proposal 22 is only addressing the C&T findings within the Chitna Sub District, and not all of PWS Area. I heard much public testimony referring to the latter.

I agree with the Department's comment that the BOF is not bound by a finding of C&T from one stock in a certain particular geographic area, to other stocks in the same area.

That is why there is a proposal before the BOF.

What is the pattern of use within the Chitna Sub District? The department's comments did not address this in their comments. Instead the department provided data for the entire PWS Area freshwater fin fish (not what the proposal was asking for).

I would hope you will ask the department to provide the BOF with the pattern of use within the Chintna Sub District of freshwater fin fish,, so you can go through the 8 criteria during your deliberations on this proposal.

Have a great day
