

This RC is submitted in response to RC 123 submitted by Nelson Lagoon Advisory Committee. It is not my intent to try and correct false statements that the Board receives through the RC process, but when it is a personal attempt to discredit myself and involves names of family members and is blatantly inaccurate, it is necessary. I hope the Board will evaluate personal attacks in RC's using names of individuals since that is clearly not permitted in the Public Testimony or Committee of the Whole portion of the meeting and should not be allowed in the RC process. This RC corrects and clarifies the Nelson Lagoon AC found in RC123.

***-Nelson Lagoon AC Statement "2004 Bob Murphy takes over management"***

Fact- Bob Murphy started managing Port Moller area fishery in 1992 not 2004 as stated.

***-Nelson Lagoon AC Statement " 2017 Connor Murphy starts setnetting in Port Moller Bight"***

Fact- Connor (my son) did start set gillnetting in 2017 and also had his 18 year old sister (my daughter) as a deckhand for one season.

***-Nelson Lagoon AC Statement "2022 Bob Murphy retires and becomes CAMF's Executive Director"***

Fact- Bob Murphy retired in 2022 and became CAMF's Executive Director in 2024. Bob did not manage the fishery his son participated in.

***-Nelson Lagoon AC Statement " 2023 Bob Murphy starts setnetting in Port Moller Bight"***

Fact- This statement is correct.

***-Nelson Lagoon AC Statement : " 2024 Meesha Murphy starts setnetting in Port Moller Bight"***

Fact- This statement is correct as Connor Murphy did not fish in 2024 and his permit was transferred to Meesha (my wife) who made 1 delivery in 2024.

*Fun Fact and full disclosure- Lily Murphy, a 15 year old Labrador retriever, spent significant time over the years eating the occasional dead flounder from the set net site 😊*
