Table 1. Estimated homepack and homepack as a percentage of total community non-commercial salmon harvest as documented through Division of Subsistence household harvest surveys for the most recent survey year, 1987-2023

Community	Year	Estimated homepack in numbers of fish		% of community salmon harvest that comes from homepack	
		King Salmon	All salmon	King salmon	All salmon
<i>Nushagak Drainage Communities</i>					
Ekwok	1987	24	24	2%	0.3%
Koliganek	2005	171	586	7%	4%
New Stuyahok	2005	62	153	2%	1%
Aleknagik	2008	153	1,091	13%	25%
Clarks Point	2008	226	1,689	43%	35%
Dillingham	2021	1,577	6,560	29%	13%
Manokotak	2023	484	1,780	58%	18%
<i>Naknek-Kvichak Drainage Communities</i>					
Iliamna	2004	0	90	0%	1%
Newhalen	2004	115	635	100%	4%
Pedro Bay	2004	0	0	0%	0%
Igiugig	2005	0	0	0%	0%
Kokhanok	2005	12	227	29%	1%
Levelock	2005	37	155	30%	17%
King Salmon	2018	49	397	19%	6%
Naknek	2018	423	1,234	62%	11%
South Naknek	2018	32	215	40%	20%
Nondalton	2021	45	90	100%	2%
Port Alsworth	2021	0	28	0%	1%
<i>Togiak Drainage Communities</i>					
Togiak	2017	768	2,186	28%	11%
Twin Hills	2017	0	0	0%	0%
<i>Egegik Drainage Communities</i>					
Egegik	2014	76	643	74%	29%
<i>Ugashik Drainage Communities</i>					
Pilot Point	2014	26	77	86%	3%
Ugashik	2014	53	1,012	56%	68%
Port Heiden	2018	259	481	33%	15%

Note Data collected through Division of Subsistence household harvest surveys. Percentage of community salmon harvest is based on the total estimated non-commercial salmon harvest from all gear types and methods for the community during the survey year, as documented through household harvest surveys.
