Please, the only reason I DREAM to travel to ALASKA is to be able to see the Bears.
Again and again, we have seen that "managing" predator's populations only takes the NATURAL BALANCE from a place, why would you do it?
Not only that you will lose a lot of naturalist tourism but you will change and probably DAMAGE such a wonderful ecosystem.
Please consider that many people around de WORLD pay expensive trips to see these beautiful animals because they should be respected and protected.

Thank you

Paola Hidalgo
